INSTALLING LARGE FORMAT TILES

In order to get the most out of you Mosaico Vero product, please take note of the following instructions...

✓ QUALITY CONTROL

As we pride ourselves in delivering quality products of aesthetic excellence we are proud to say that all our large format tiles are 1st grade tiles. However we do suggest that on delivery tiles should be checked for any defects and quality, as no claims will be entertained after installation. **DO NOT** install any tiles if you have concerns about their condition. After installation, we can no longer be held accountable for any defects, warpage, chips or discolouration.

✓ INSTALLATION PATTERN:

As installation depends on whatever pattern you as the consumer choose, we can only recommend that any large format tile should not be installed at more than 33% overlap in the stagger pattern (See Figure A). We also recommend installing in a soldier pattern (See Figure B).

✓ INSTALLATION PROCESS

When installing large format tile, there must be at least 90% mortar contact and a minimum grout joint of 3mm. Large format tiles must be installed on a level substrate. Please ask your store rep for adhesive recommendations. For these larger format tiles we do however suggest that they be tiled with porcelain glue. Make sure that you have an experience and qualified tiler that knows how to work with these specific tiles.
